Hi Jeff,

Thank you for the update! Please let us know if Firmenich can provide any additional information. We really appreciate your efforts on both reports.

Best,

John

John,

Happy New Year. I spoke with the engineer and he is working on your report this week with the new information you submitted on 633. I will then request an updated exposure report which calculated gen pop and consumer exposures. That will then go back to the Human Health staff to update the risk assessment for the gen pop and consumer exposures to see if sensitization is still a concern. This report is almost complete and that's why I needed clarification on the concentration.

For 326, I am still waiting on the updated Human Health risk assessment. I thought I would have had it in December. RAD has changed up their priorities and this PMN has a low probability of being completed this month. I will see what I can do to get that report.

Jeff

Hi Jeff,

Happy new year and hope you had a great holiday. Thank you again for the updates you provided late last year. Just wanted to follow up on our 2 pending cases.

- P-16-0326
  - Any update if the human health report can be completed this month?
  - Can you share any information on the environmental assessment? We are particularly interested in the CoC and if any SNUR is anticipated to control for environmental releases.
- P-15-0633
  - Do we have any update from engineering and human health regarding the additional support document Firmenich submitted?

Hope all is well and best wishes for the New Year.

Best,

John

Hi Jeff,

Thanks for the update. I appreciate you following up with the engineer and human health on P-15-0633.

For P-16-0326, thanks for following up on the human health report. I know that you are waiting on it but anything we can do try to get a result early in January would be helpful.

In the meantime, can you provide any information the environmental review for P-16-0326? We are particularly interested in the CoC and if any SNUR is anticipated to control for environmental releases.

Thank you,

John

John,

I did forward the new information for 633 to the engineer to incorporate into his report and I need that to forward to the Human health person to finish that report.

326 was on the RAD pipeline to CCD for the week of 12/6, I still do not have the final Human Health report and I doubt that it will be done this month.

Jeff

Hi Jeff,

Wanted to follow up on these cases.

For P-15-0633 have you been able to evaluate the supporting document we uploaded to CDX?

For P-16-0326 do you have any update on the timing we may hear back and likely outcome? From our last conversation you were still waiting for the Human Health Assessment. Is there any update on human health and were there any concerns with the environmental risk assessment?

Thanks,

John

Hi Jeff,

I realize we have exchanged voicemails in the past few weeks.

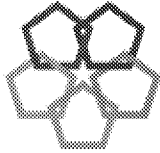

Wanted to check in about the document we recently uploaded to CDX for P-15-0633 and see if you needed any additional information for this case?

And we were also wondering if you had an update for P-16-0326?

Thank you,

John
